

SWANPACK
Packaging Machines

Filling Machines for Granules, Powders, Liquids & other Products

“SWANPACK” Liquid Filling Machine:

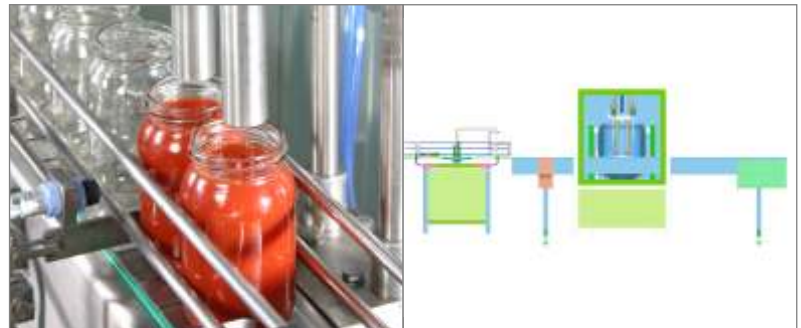

- Volumetric Pneumatic-Piston Filling Technology.
- Fills Oils, Pesticides, Pharma formulations and other free-flowing liquids.
- Fills from 100-1000 ml and upto 10 liters with Maximum Accuracy.
- Special heat resistant cylinders and jacketed hopper for hot filling.
- No change parts and very less maintenance.
- PLC controlled system.
- Diving Nozzle Mechanism avoids foaming and spillage.
- Anti-drip system helps in keeping the filling area clean.

(Available as a Standalone machine and also as a complete auto line with 1,2,4,6 filling Nozzles.)

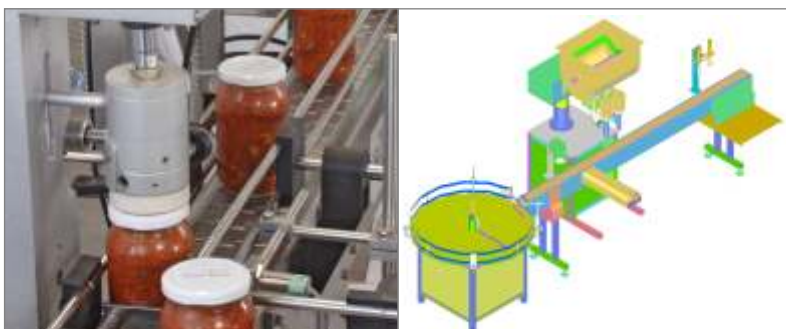

“SWANPACK” Viscous Liquid Filling Machine:

- Volumetric Pneumatic-Piston Filling Technology.
- Fills sauces, fruit juices, ketchup, ginger-garlic pastes, curry pastes, ready to eat foods, adhesives and other viscous liquids.
- Special heat resistant cylinders and jacketed hopper for hot filling.
- Fills from 100-1000 ml and upto 10 liters with Maximum Accuracy.
- Special stirrer in the hopper.
- No change parts and very less maintenance.
- PLC controlled system.
- Diving Nozzle Mechanism avoids foaming and spillage.
- Anti-drip system helps in keeping the filling area clean.

(Available as a Standalone machine and also as a complete auto line with 1, 2 and 4 filling Nozzles.)

“SWANPACK” Pickle / High Viscous Filling Machine:

- Volumetric Pneumatic-Piston Filling Technology.
- Fills all types of pickles, curry pastes, chawanprash and other high viscous liquids.
- Capable of cutting any hard shell during filling.
- Overhead hopper filling pump with level controller.
- Special stirrer in the hopper.
- Settling device removes air gaps from the filled bottle.
- Online Oil topping Machine.
- Fills from 100-1000 gms with Maximum Accuracy.
- No change parts and very less maintenance.
- PLC controlled system.
- Anti-drip system helps in keeping the filling area clean.

(Available as a Standalone machine and also as a complete auto line with 1 and 2 filling Nozzles.)

“SWANPACK” Powder Filling Machine:

- Auger filling technology.
- Fills all kinds of free flowing powders.
- Fills from 1 gm to 1 kg and also can multi dose for higher volumes.
- Available in clutch / brake and servo controlled systems.
- **Optional:** Vibrators for quick product settling, dust control and Nitrogen gas Purging systems.

(Available as a Standalone machine and also as a complete auto line with 1 and 2 filling heads.)

“SWANPACK” Granule Filling Machine:

- Volumetric Cup filling technology.
- Fills all kinds of free flowing granules like seeds, oats, muesli, grains, coffee, biscuits etc.
- Fills from 10 gm to 10 kg and also can multi dose for higher volumes.
- No change parts and very less maintenance.
- **Optional:** Vibrators for quick product settling and Nitrogen gas Purging system.

(Available as a Standalone machine and also as a complete auto line with 1 and 2 filling heads.)

Accessories and Optional Equipment:

“SWANPACK” offers the following equipment which can be synchronized to the filling lines.

- Rotating Turntable for feeding of empty containers to the conveyor.
- Jet-air empty bottle cleaning system.
- Ultraviolet Radiation Chamber for disinfection of the empty bottles before filling.
- Insert-cap chucking system.
- Storage hopper with independent stirrer, screw conveyor and level controller for powders.
- Pneumatic cap tightening system.
- Lug capping system.

“SWANPACK”

Swanpack packaging machines is involved in the manufacturing of quality filling and packaging machines mainly catering to the food, cosmetic, agro chemicals, other chemicals and pharma sectors. The company is managed by a team of highly professional and experienced technocrats. Swanpack believes in setting the standards to which the market aspires. Advanced technology offers consistently high production, shorter batch cycles, minimal operating costs, low space requirements and simple operation. Complete designing is computerized and all the components are of international standards which are rigorously tested.

“SWANPACK” Salient Features:

- All our machines can fill into bottles of Pet, Glass, Aluminum, Tin, HDPE and Pre-made Pouches.
- GMP Standards.
- No bottle – No fill Controls in Auto lines.
- PLC controlled systems.
- Efficient on-time on-site service with experienced engineers.
- 24x7 Telephonic Support.
